

Press release: Hot Spot Social

Press Release: Hot Spot Social enters pre-launch.

Hot Spot Social is the webs newest social networking community offering video, photo, music, and mass communication facilities.

From people seeking friends and relationships to building careers and business presence Hot Spot Social has it all. Cool features like our in house affiliate program and Hot Spots make us a great place to grow with. Contest and group activities, rate a friend and hot or not provide reasons to stay active.

Hot Spot Social is free to join and members get a full range of services like the video and music sharing mentioned above, blogs, personalized profiles, forums, and groups. The possibilities are endless.

The Hot Spot program allows members to mark their websites as member owned so other members will stop and look more closely while surfing the web for information. Members are also welcomed to review websites and send the web-master a Hot Spot saying member reviewed or member recommended site. The Hot Spots will build trust and assist websites in branding their name, products, and programs.

Freedom above all else is a core belief at Hot Spot Social. We offer a environment without SPAM that still maintains a members rights to profit from the Internet. Our community enters pre-launch on Saturday April 5th, 2008 and many contest will follow. We are looking at massive video promotions and member drives to grow rapidly over the next 6 months and beyond "Says Andy Anderson" owner of the site.

From the look and feel to the tools available this social networking solution will be a must have for all persons over the age of 18. No members under the age of 18 are allowed as the sites owners do not wish to risk subjecting children and young adults to the potential of being exposed to adult related content. Adult content is not allowed on the site but we recognize that despite our best efforts those who wish to force these materials on the public will still try to get it posted on Hot Spot Social, while we pull any adult material from the site and ban the poster as soon as it becomes known, someone will see it and report it before we can take actions, our goal is to make sure that the person filing the report is a adult member and not one of our children "Says Andy".
