

Why choose an online casino over a real casino?

Gamblers have never had so much choice with the vast availability of online casino's now flowing through the internet super highway, but why would you choose an online casino over the real thing? Here are 5 good reasons:

1) You don't need to waste money or time travelling to an online casino as its available right from the comfort of your home. This will cut out the stress of travelling and leave your concentration on the game. Any money spent on travelling could be used on that final winning hand.

2) If your playing card games like online poker you don't need to worry about showing any physical signs of tell which could give away your bluff and lose your hand.

3) Most [online casinos](#) will actually give you money for free on signup. So you can try out gambling to see if it's for you and you also have the chance to start winning money without digging into your own pocket.

4) You can play when ever you want 24hrs a day, no restriction or closing times.

5) Your money is safer. You don't need to worry about losing chips or handling cash as all money is either in your bank account or in your online account with the casino that gets directly transferred to your personal bank account.

Some people will argue that you don't get the same atmosphere from playing in online casinos or the equivalent thrill as actually being there at the table. But the fact of the matter is online casinos are safe and at the touch of a button you can enter or leave the casino when ever you like.
